DILIGENT TUTORS BUERO

A little practice. A world of possibility.

Algebra foundations

Solve one step at a time. Suggested level: Classes 6-8.

Name: _____ Date: _____

Remember: do the same operation to both sides.

1. x + 7 = 15

2. 3x = 21

3. 2x + 3 = 11

4. 5x - 4 = 26

5. x / 3 + 2 = 6

6. 4(x - 2) = 20

Challenge: Write your own equation whose solution is x = 5.

Check your thinking

Answer key - compare the steps, not just the final number.

1. x = 8

Subtract 7 from both sides: x = 15 - 7.

2. x = 7

Divide both sides by 3: x = 21 / 3.

3. x = 4

Subtract 3: 2x = 8. Then divide both sides by 2.

4. x = 6

Add 4: 5x = 30. Then divide both sides by 5.

5. x = 12

Subtract 2: x / 3 = 4. Then multiply both sides by 3.

6. x = 7

Divide by 4: x - 2 = 5. Then add 2 to both sides.

Challenge example: 2x + 1 = 11. Many other correct equations are possible.
